

East Flagstaff Traffic Interchange Project

The Arizona Department of Transportation (ADOT) and the Federal Highway Administration in coordination with the City of Flagstaff, Flagstaff Metropolitan Planning Organization, and Coconino County are evaluating proposed improvements to the East Flagstaff Traffic Interchange at US 89 and B-40/Country Club Drive from Fanning Drive to Cummings Street. This project will also improve a small segment of Route 66. The purpose of the project is to serve regional and local transportation needs to relieve congestion on local roadways, enhance the pedestrian and bicycle facilities, address drainage issues, and serve the growing needs of the area.

The project is subject to compliance with the National Environmental Policy Act of 1969 (NEPA). Under this law, an Environmental Assessment (EA) is being prepared to assess the impacts of the project on the natural, human, and social environment. To fully assess those impacts, alternatives are being compared to make sure the best design is achieved to meet the needs of the community and have as little negative impact as possible.

Public Involvement

A public meeting was held on December 3, 2003 at Christensen Elementary School to gather input from the community on the potential social, economic and environmental considerations associated with four alternative improvement strategies.

Community Update
